1. Claim 2 is objected to under 37 CFR 1.75 as being a substantial duplicate of claim 13. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 9, 10, 12 and 14-16 rejected under 35 U.S.C. 102(b) as being anticipated by Haffner et al. 6,209,762. The embodiment of figures 6-8 of Haffner disclose an insert 64 for a container 12 defining a volume 14 and a neck 16, the insert 64 including an outer wall 20 with an upper edge at the end of the pointer for 20 in figure 7, a lower edge as is the perimeter of 70, and a lip 42 which lip 42 begins at the upper edge at the end of pointer 20 in figure 7 and continuously extends to the end of pointer 42 in figure 7 and thereby is extending radially outward from the upper edge as claimed with the lip including a notch 36 and engages a tooth 46, a spout 66 and a bottom wall 70. Since claim 9 is drawn only to an insert and insert 64 includes every element of the claimed insert, the insert 64 of Haffner anticipates the insert of claim 9. The cover is only mentioned in the claim preamble and is not part of the claimed combination wherein the insert 64 of Haffner is capable of being used with a neck threaded cover as mentioned in the preamble.

Art Unit: 3754

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 9-12 and 14-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Haffner et al. 6,209,762 in view of Haffner et al. 5,462,202. The embodiment of figures 6-8 of Haffner'762 disclose an insert 64 for a container 12 defining a volume 14 and a neck 16 and a cover 24 substantially as claimed but does not disclose the cover to thread onto the neck. However, Haffner'202 teaches another spout insert 26 for a container 20 having a cover 35 with threads that attach to the container neck 22 for the purpose of having the cover separately anchor and protect the insert. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to provide the assembly of Haffner with a cover that threads to the container neck as, for example, taught by Sledge in order to have the cover separately anchor and protect the insert. In regard to claim 11, Haffner'202 further teaches that it is well known to make inserts from low density polyethylene on column 2, lines 53-56.

6. Claim 13 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. Claims 1-8 and 17-28 are allowed.
